

Productivity Focused IT Strategy for Small Businesses.

We understand that getting good value is especially important in today's financial climate. You need to spend your money wisely, where it will make the biggest difference and provide the most value.

Large companies can afford to invest a lot of money into IT systems because they know they will get a healthy return on their investment. For smaller companies it can be a lot more difficult to make sure you invest, a smaller budget, in the right areas and get the best return.

This is where we can help, using our knowledge and experience to provide you with the IT systems your business needs to thrive at the best price. As we look after everything you get a much better experience for a lower cost, and we can ensure that the money you spend makes a positive difference to your business.

So you can feel sure your IT is working for you, not that you're trying to make your IT work.

Some of the things we can help with are

- Office Applications
- Productivity tools
- Working together on documents,
- Telephone system
- Web site management
- Document organization
- Email and Calendars
- Automation and AI
- Security
- Data backup

With employment costs rising faster than ever, it's vital that your team, no matter how small, is working as efficiently and productively as possible.

For smaller businesses, where every team member wears multiple hats, the right tools can make a world of difference.

Key Facts

- 74% of Microsoft 365 users are small businesses.
- 95% of UK businesses are micro businesses with up to 9 employees.

Despite this, many small businesses end up using whatever software they can find or what's recommended, often without a clear strategy. This leads to tools that don't integrate well, wasted time, and avoidable costs.

How We Help

- Expert Setup: Tailored configuration for your business and users.
- Streamlined Tools: Remove unnecessary software and simplify your setup.
- Productivity Training: Easy-to-follow guidance for your team.
- Ongoing Support: Friendly, accessible help when you need it.
